

# ICT skills for educators at ShipCon Limassol Ltd in Barcelona – Dr. Efstratios Georgoudis

Start: 08-04-2019 – End: 12-04-2019  
Project Reference: 2018-1-AT-01-KA104-038725  
Programme: Erasmus+  
Key Action: ICT skills for educators  
Action Type: Education  
Topics: ICT – new technologies – digital competences, International cooperation

## Background of the Project

In the course of the course I have been introduced to new ICT tools and their application in class and expand my knowledge. My visit to Dr. Efstratios (ShipCon) in Barcelona gave me the opportunity to gain insights into the latest practical tools. The aim is to use this gained know-how in my lessons to simplify the structural presentation of learning contents and learning goals for my students and myself.

## Objectives

In the course of the course I explored innovative ICT tools and their application in class. My visit to Dr. Efstratios (ShipCon) in Barcelona enriched my know-how to simplify my structural presentation of learning contents and learning goals for my students and myself.

## Number and Profile of Participants

Doris Wippel (female). In the past ten years I gained extensive experience in advertising and (online) marketing. I'm an established graphic designer. Now, I study education at the teacher training college in Linz. I'm leading workshops for the Research and Innovation Management GmbH.

## Description of Activities

The necessary insights from the theory were conveyed to me with the help of training tools, such as case studies, videos, games, animations and practical experiences.

## Methodology

There was also constructive feedback and reflections on the tools learned. A technological tool has been made available for educators to improve the level of key skills and ICT skills. Access to a variety of online resources to promote good educational practice has been a key element of this course. Ideas and materials were also shared between colleagues within the EU. Another great learning content was the introduction of new teaching methods, which do me a lot of good in my job as a coach. Another success for me is that I was able to significantly improve my language skills as part of this course.

## Impact

The desired impact of this course will result in using the learned and discussed methods in class in my future work with my learners. Likewise, experience with the other participants from the EU can be shared and discussed in the future, which will help me a lot in my job.
